

The Wirtschaftsschule Dinkelsbühl was and I suspect will remain committed to preparing students for a multicultural and globalised world. There was a heavy emphasis on knowing and understanding the different cultures within the European Union and the school participated in many international trips and hosted international guests on several occasions. One of the bigger events was Europa Day, which was dedicated to recognising the achievements of the school's various Erasmus+ projects as well as showcasing a number of European nations celebrating their unique cultures. The school has been awarded on several occasions on the basis of merit for these programs. For example, for these projects the Wirtschaftsschule earned the "Quality Seal" from the German National Agency in Bonn. They were also awarded the "European Certificate" from the Bavarian Ministry of Culture in 2018, they are the only school in Central Franconia to receive such an award. In 2021 Wirtschaftsschule Dinkelsbühl was the first German vocational school to receive the "European Innovative Teaching Award". As the European Union becomes a bigger economic force in the world, the students from Wirtschaftsschule Dinkelsbühl will be well prepared for the job market.
